

Joost Slager

Coating Technician

Summary

Laboratory Assistant/Coating Technician with experience in epoxy and water based coatings. Schooled as a chemist in analytical, organic and polymer chemistry. A trainee ship at Akzo Nobel in the line of car-repare coatings and a graduation assignment with Akzo Nobel as well working on the fire retardant properties of EPS (Expandable Polystyrene).

After graduation started working with Schaepmans Lakfabrieken B.V. gaining experience with different coatings and test methods. For a short period worked with BASF Nederland B.V. on water based emulsion for the coating industry for wood and metal before returning to Schaepmans Lakfabrieken B.V.

In my spare time I like to play golf, hockey and listen to music or hang out with friends.

Specialties

Formulation, modification and testing of coatings (water based as well as epoxy based).

Experience

Coating Technician at Schaepman's Lakfabrieken

January 2010 - Present (6 years 4 months)

The function of laboratory assistant contains the formulation, testing and improvement of industrial and protective coatings for different companies.

Some of my activities are:

- Formulation of (new) coatings
- Testing of coatings according to different standards and test methods
- Helping clients with problems that arise when the coating is applied

Blogger at Intogadgets.nl

March 2015 - Present (1 year 2 months)

Voor het blog intogadgets.nl mag ik artikelen schrijven over gadgets. Van nieuwtjes en reviews tot tips over het gebruik ervan.

Blogger at 42bis

April 2013 - December 2014 (1 year 9 months)

Het schrijven van artikelen over gadgets, (android) apps en andere zaken voor 42bis.nl

Application Technician at BASF Nederland B.V.

August 2009 - December 2009 (5 months)

Application Technician for waterborne resins for the coating industry. Work on waterborne resins for coatings includes:

- Solvent studies
- Hardness development
- Adhesion testing
- Saltspray and Humidity testing

Laboratory assistant/Coating Technician at Schaepman's Lakfabrieken B.V.

November 2007 - June 2009 (1 year 8 months)

The function of laboratory assistant contains the formulation, testing and improvement of industrial and protective coatings for different companies.

Some of my activities are:

- Formulation of (new) coatings
- Testing of coatings according to different standards and test methods
- Helping clients with problems that arise when the coating is applied

Intern at Akzo Nobel

April 2007 - October 2007 (7 months)

Internship with the "Market Team Olefinics, Styrenics and Acrylics". I have investigated flame retardancy in EPS (expandable polystyrene).

Intern at Akzo Nobel Car Refinishes

February 2005 - August 2005 (7 months)

Intern ship for my bachelor degree chemistry. I have done a study into the improvement of car repair coating.

Volunteer Experience

Trainer at Hockey Club Kampen

August 2012 - Present

I train goalkeepers from different teams. Teaching them the basics and try to assist them to get better.

Languages

English

Dutch

(Native or bilingual proficiency)

German

Education

Saxion Hogescholen

Bachelor, Chemistry, 2002 - 2007

Activities and Societies: Fraternity S.V SAAM

Nassau Veluwe College

HAVO, Profile Physics & Chemistry, 1999 - 2001

Christelijke Mavo Groen van Prinsterer

MAVO, See Activities and societies, 1995 - 1999

Basisschool 't Wold

1992 - 1995

Interests

Chemistry (Coatings/Paints/Polymers/General interest), Music (Festivals/Production/Dj-ing), Games (board and computer)

Joost Slager

Coating Technician

1 person has recommended Joost

"Joost is a dedicated Laboratory assistant with a good knowledge about paint and their formules. He seems to like helping out colleague who has a technical problem. He also is a nice colleague with lots of humor."

— **Martijn Kuipers**, worked with Joost at Schaepman's Lakfabrieken B.V.
