Projects:

Sem V :

Developed an E-Commerce Website with Basic features.
(<http://www.gmp.site90.com/Project/HomePage.php>) Developed some mini projects as a part of academics.

Sem VI:

Developed an online chatting server. A kind of similar to omegle.com. But, with additional feature of image sharing. Using php and mysql. It was like talk to strangers without login in. Single-handedly created project.

SEM VII:

Here, I was much Concentrating on the Artificial Intelligence domain. And, I have written various programs on A.I algorithm along with id3 decision tree, using python.

Final Year Project:

We are building a Resume Ranking system fully automated, using Machine learning and Natural Language Processing and using mongoDB as a database constraint. Which will take resume' in any format and parse them accordingly, in efficient way. And our ranking algorithm will sort them according to the constraints of the client company. And we are trying to include many more features with respect to new ideas.

Awards:

My group has won **1st prize** in national level poster presentation for demonstrating our final year project, Resume Ranking System using NLP and ML.

Extra Curricular Activity:**Social Networking cum broadcasting web application :**

Beside the academic activity, I have created a single handed project using php and mysql a kind of social broadcasting cum social networking website. It was elegantly created my design, my logic and everything single thing. It took me 6month. but unfortunately due to financial lacking, It remained in my computer only. You would love to see it.

Experience :

I have worked as a trainee php developer for Vizista Technologies Pvt Ltd. On the hospital management project for 45days. And successfully completed the project.
